PROFESSIONAL EXPERIENCE

Google

New York, NY

Member, Code Next Program

Sep 2023 – Present

- Designing a dynamic personal website with HTML and CSS, featuring captivating content on soccer teams and players
- Integrating image tags within websites and embedded YouTube highlights to engage and provide visuals for user interface
- Developing informative web applications to provide a comprehensive overview of personal interests and academic pursuits

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Web Design | Emulating Apple Websites

New York, NY

Web Developer, Personal Projects

Sep 2023 – Present

- Deployed dynamic features, such as hyperlinks and a randomly generated map based on a 2D array, creating an engaging and immersive user experience across multiple pages on the website.
- Operated a dynamic web application with HTML and CSS, skillfully incorporating Bootstrap for interactivity. The design closely emulated the aesthetics of the Apple website as of October 2023, ensuring a seamless and enjoyable user experience.

Web design | Personal MTA Website

New York, NY

Web Developer, Personal Projects

Sep 2023 – Present

- Computed interactive features and included a linked image for express 7 train stops, and a background image featuring the MTA logo for a visually engaging and informative website.
- Coded an interactive MTA train schedule webpage using HTML and CSS, incorporating hyperlinks for each train with custom borders and colors corresponding to their respective lines, enhancing visual appeal and user engagement.

Web design | Restaurant Website

New York, NY

Web Developer, Personal Projects

Sep 2023 – Present

- Programmed a restaurant website utilizing HTML and CSS on Replit, demonstrating a dynamic homepage with a visually appealing food collage and a responsive navbar featuring animated hover effects.
- Implemented structured divs on subsequent pages for detailed categorization of food, drinks, and wine, integrating engaging content like images and descriptive paragraphs to convey the restaurant's identity and aspirations.

Other Affiliations: Upward bound (Saturday Classes, Summer Classes - Pace University), College Now (Pre-Calculus, College Algebra 2 - City Tech), Web 3.0 Blockchain (Summer - City Tech), MongoDB Program (Partner: MongoDB, After School, Used Bootstrap, Build Website)
